

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

SECTION A: ACTIVITY PROFILE

NAME OF PROVIDER:	AIT / Archoney Institute of Technology
ACTIVITY/PROGRAMME/COURSE NAME:	I Learn To Read English using the LiTRE method
DURATION OF THE ACTIVITY/PROGRAMME/COURSE:	1 Day
PURPOSE OF ACTIVITY: What is the purpose of this activity? (not exceeding 300 words)	
LITRE – I Learn To Read English is a teacher professional development programme that introduces educators to a practical, structured method for supporting the teaching and learning of early reading through letter recognition, blending and word construction. The activity enables teachers to experience the method themselves through practical and oral activities, demonstrations, guided practice, eLearning content and assessment. Teachers learn how a visual and hands-on “blending machine” can be used to make the process of joining letters and producing blended sounds concrete and understandable. The programme is intended to support teachers in applying the method within their existing literacy teaching and curriculum practice, particularly where learners require additional or reinforced reading instruction. Teachers will practise the method, consider its classroom application, complete knowledge and application assessments, reflect on their experience and evaluate the programme and digital learning environment. The activity therefore aims to strengthen teachers' practical knowledge, pedagogical	

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

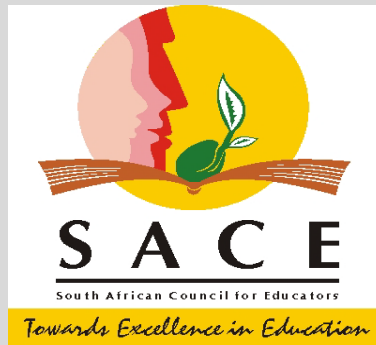

skills and confidence in supporting learners' development of early reading skills.

TARGET AUDIENCE: (Please describe the target group for this activity)

Foundation Phase including ECD educators involved in the teaching of early literacy and reading, including teachers who support learners requiring additional or reinforced reading instruction. The programme is suitable for educators with varying levels of teaching experience and prior knowledge, as the method is introduced through guided practical activities, demonstrations, eLearning and classroom application.

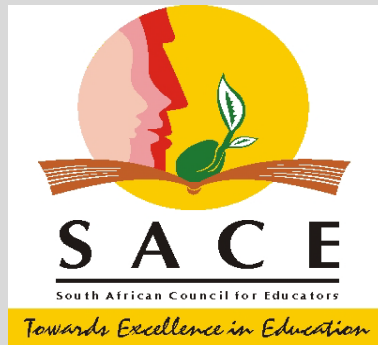

OUTCOMES OF THE COURSE/ACTIVITY/PROGRAMME: (make sure they are clearly defined, realistic, appropriate for the target group and inclusive of Skills, knowledge and values)

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

- By the end of the programme, participants will be able to:
- Explain the LITRE approach and the role of letter recognition and blending in early reading.
- Demonstrate the LITRE blending method using practical teaching aids and activities.
- Apply the method to support learners in recognising letters, combining letters into blended sounds and progressing towards word recognition.
- Select and adapt appropriate LITRE activities for learners with different levels of prior reading knowledge and ability.
- Integrate LITRE activities into their existing literacy teaching and classroom practice.
- Use the AIT eLearning platform, videos, practical activities and assessments to support their professional learning and classroom preparation.
- Assess and reflect on learner progress and their own teaching practice when applying the method.
- Demonstrate professional values of patience, encouragement, inclusion and respect for individual differences in learners' reading development.

DETAILED SUMMARY OF THE CONTENT OF THE COURSE/ACTIVITY/PROGRAMME (You may attach a complete manual/ booklet as an annexure or appendix):

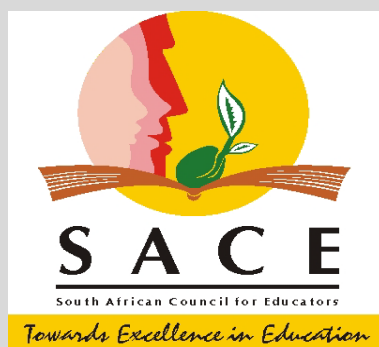

The LITRE programme is delivered through the AIT eLearning platform and a practical teacher workshop. The content introduces teachers to a structured approach to early reading centred on letter recognition, vowels, consonants, blending and word construction.

The programme includes:

- Introduction to LITRE – the purpose and principles of the method.
- The English alphabet – recognition of letters and the distinction between vowels and consonants.
- The Blending Machine – creating and using the practical palm-and-finger model to represent the relationship between letters.
- Vowels – identifying, learning and placing the vowels in the appropriate positions.
- Consonant and vowel blending – practical activities demonstrating how a consonant meets a vowel to produce a blended sound.
- Blending practice – progressive activities using different consonants and vowels, supported by flash cards and guided repetition.
- Word construction and reading – applying blends to construct and read words and simple sentences.
- Classroom application – consideration of how teachers can adapt and use the activities within their existing literacy teaching.
- Assessment – practical activities, knowledge checks and a final assessment using the AIT question bank.

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

- **Reflection and evaluation – participants evaluate their learning experience, the facilitator, the programme and the AIT eLearning platform, and identify possible improvements.**

The programme uses video demonstrations, practical and oral activities, guided instruction, worksheets, flash cards, eLearning content, assessment and reflection. The practical experience is followed by classroom application so that teachers can move from experiencing the method to applying it in their own teaching environment.

Explain how the outcomes are linked to the content and assessment?

The outcomes are directly linked to the content and assessment activities. Participants first acquire knowledge of the LITRE approach and the principles of letter recognition and blending, then demonstrate their understanding through practical activities using the Blending Machine, vowels, consonants, flash cards and word construction activities.

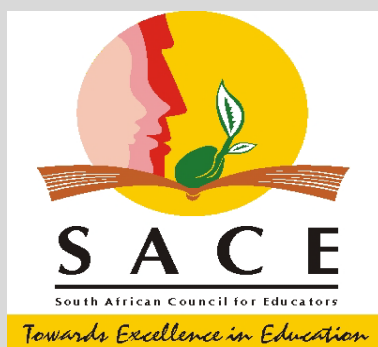

Knowledge checks and chapter assessments measure understanding of the concepts, while practical activities assess the participant's ability to demonstrate and apply the method. Classroom-application activities assess the participant's ability to adapt the method to their teaching environment.

The final assessment, supported by the AIT question bank and shuffled questions, provides an overall measure of knowledge gained. Reflection and programme evaluation provide evidence of participants' ability to consider their own practice and identify areas for improvement.

Thus, the assessment progresses from knowledge → practical demonstration → application → reflection, directly corresponding with the programme outcomes.

Give an explanation on how the purpose and scope of your PD activity meets each of the

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

following AND / OR why certain of these criteria items are irrelevant to your activity / programme (you may attach a document if the space is not enough):

RELEVANCE:

a) What is the rationale of the activity/programme/course with reference to education policies, diagnostic reports, Human Resource issues, current curriculum practice or any other system assessments (e.g. National Curriculum Statements- CAPS? How does your activity contribute to the realisation of any of these?

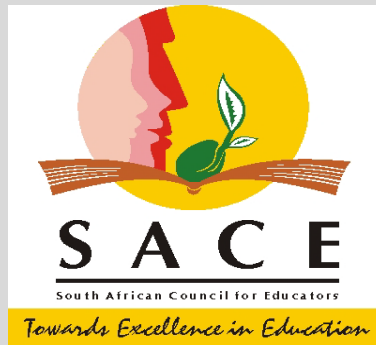

LITRE is designed to support teachers in strengthening the teaching and learning of early reading within the existing South African curriculum. The programme does not replace or seek to alter the NCS/CAPS curriculum. It provides teachers with an additional practical methodology for teaching letter recognition, vowels, consonants, blending and word construction.

The programme responds to the need for effective classroom approaches that can assist learners who experience difficulty progressing in reading. It strengthens teachers' practical and pedagogical knowledge by allowing them to experience, practise and apply the method themselves. Refer to the Crisis in Reading in SA schools: [2030 Reading Panel's 2026 report](#)

The LITRE activities can be incorporated into existing literacy teaching and adapted to the needs and abilities of learners. Through practical and oral demonstration, eLearning, classroom application and assessment, the programme supports teachers in translating knowledge into classroom practice and monitoring their own learning and application.

b) Does your activity/programme/course contain clear planning relating activities to outcomes? Is time allocated per activity reasonable and realistic? Is the number and duration of activities suitable to achieve each learning outcome?

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

Yes. The programme has a clear sequence linking each learning activity to the stated outcomes. Participants progress from introduction and demonstration, to practical experience, application, assessment and reflection.

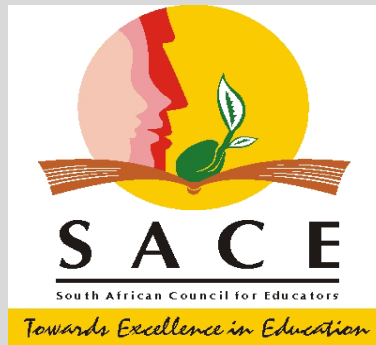

The one-day workshop timetable allocates appropriate time for participants to experience the LITRE method, practise the activities, engage with the AIT eLearning content and complete the required assessments. The practical activities are followed by application and knowledge checks so that participants can immediately consolidate what they have learned.

The number and duration of activities are designed to provide sufficient opportunity for participants to develop the required knowledge and practical skills without unnecessary repetition. The programme also allows for individual differences in prior knowledge and experience.

The AIT platform records participant progress and assessment results, providing evidence that the planned learning activities have been completed and that the intended outcomes have been assessed.

c) Explain how your activity/programme/course strengthens competence of prospective participants (subject matter knowledge, pedagogical content knowledge, knowledge of learning and curriculum, general pedagogical knowledge, knowledge of participants management and leadership competence, class management, communication skills, team working skills, 21st century skills and ICT).

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

The programme strengthens teacher competence by developing both subject knowledge and practical pedagogical skills in early reading. Participants develop understanding of letters, vowels, consonants, blending and word construction, and learn how these concepts can be presented through practical, learner-centred activities.

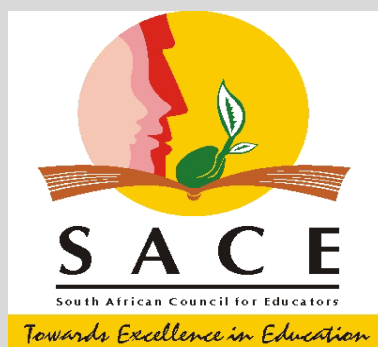

Participants practise explaining and demonstrating the method, communicating with learners, managing classroom activities, responding to different levels of learner understanding and adapting activities to the classroom context. Working in pairs during the workshop also develops communication, cooperation and peer-learning skills.

The programme strengthens teachers' ability to translate knowledge into classroom practice through guided application and reflection. The AIT eLearning platform further develops participants' ICT and digital-learning competence through videos, interactive learning content, worksheets, assessments, progress tracking and digital certification.

The programme therefore develops subject knowledge, pedagogical content knowledge, classroom management, communication, collaboration, learner support, reflective practice and ICT skills relevant to contemporary teaching.

d) Does your activity/programme/course strengthen professional commitment and attitudes of participants? If yes justify

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

Yes. The programme strengthens professional commitment by encouraging teachers to take an active and reflective role in supporting learners' reading development.

Participants are expected to practise the method, consider learner differences, apply the approach in their classrooms and reflect on its effectiveness rather than simply receive information. The programme promotes patience, encouragement, inclusivity and responsiveness to individual learner needs.

The practical and collaborative nature of the workshop also encourages teachers to share experiences, learn from one another and develop confidence in adapting teaching strategies to their classroom circumstances. Progress monitoring, assessment and programme evaluation further encourage professional responsibility and continuous improvement.

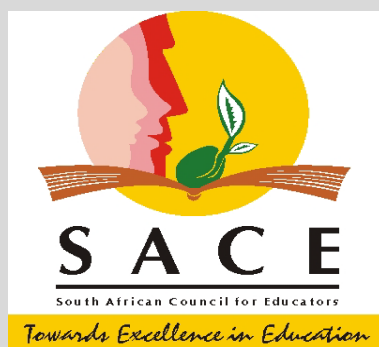

e) Is it clear for prospective participants how they can apply your activity/programme/course in practice (developing awareness, building knowledge and understanding, translate knowledge into practice, practising new knowledge and creating opportunities to reflect)?

Yes. The programme provides a clear progression from awareness and understanding to practical application and reflection.

Participants are introduced to the LITRE approach through the AIT eLearning content and demonstrations, develop their understanding of the method, and then practise the activities during the workshop. They apply the method through simulated classroom activities and are guided on how to incorporate the approach into their existing literacy teaching.

Participants receive opportunities to assess their understanding, discuss their experience, reflect on classroom application and identify adaptations required for different learners. The AIT platform provides continued access to the learning

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

materials, allowing teachers to revisit demonstrations and activities when preparing for classroom implementation.

This progression enables participants to learn, practise, apply, reflect and improve their teaching practice.

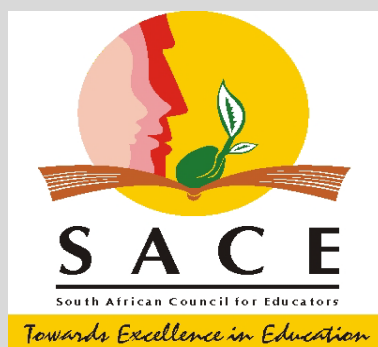

TEACHING METHOD(S): List and briefly describe the teaching method(s) that you are going to use.

The programme uses a combination of eLearning, practical demonstration, guided practice, collaborative learning, discussion, application and assessment:

- **eLearning and video instruction – Participants access structured content, demonstrations and explanations through the AIT platform.**
- **Practical demonstration – The facilitator demonstrates the LITRE method and the use of the Blending Machine, flash cards and other teaching aids.**
- **Learning by doing – Participants practise the activities themselves, including taking turns as teacher and learner.**
- **Guided practice and classroom simulation – Participants apply the method in simulated classroom situations and practise explaining activities to learners.**
- **Collaborative learning and discussion – Participants work in pairs/groups, discuss experiences and share approaches to classroom application.**
- **Assessment and reflection – Participants complete knowledge checks and assessments, review their responses and reflect on how the method can be applied in their teaching.**

These methods provide a progression from seeing and understanding → doing →

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

applying → assessing → reflecting.

Is your activity/programme/course using appropriate teaching and learning methods? If yes justify your answer.

Yes. The teaching and learning methods are appropriate for the target group because participants are practising teachers and require both understanding and practical classroom application.

The programme combines eLearning and video instruction with demonstration, hands-on practice, collaborative learning, discussion, classroom simulation and assessment. This enables participants to experience the LITRE method rather than only receive theoretical information.

The practical and oral activities allow teachers to practise the method and develop confidence in presenting it to learners, while discussion and reflection allow them to consider different learner abilities and classroom circumstances. Assessment provides evidence of knowledge and understanding, while the AIT platform enables participants to revisit learning materials and monitor their progress.

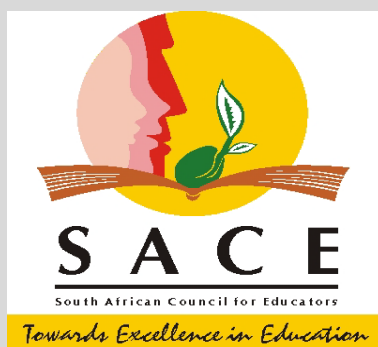

The methods therefore support the intended outcomes by connecting knowledge with practical teaching skills, classroom application and reflection.

Specify how your activity/programme/course deals in its teaching methods with diversity in background, experience, prior knowledge and learning preferences?

The programme accommodates participants with different teaching experience, prior knowledge and levels of confidence through a step-by-step, practical and flexible approach.

Participants are introduced to the LITRE method from its basic concepts and are then

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

guided through demonstrations, hands-on activities, eLearning, discussion and classroom simulation. Teachers with greater experience can contribute their classroom knowledge and adapt activities, while participants with less experience receive guided practice and support.

The programme uses multiple learning approaches, including visual video demonstrations, spoken explanation, practical hands-on activities, reading, discussion, individual assessment and collaborative pair work. This provides different opportunities for participants to understand and practise the content.

Participants are also encouraged to consider the different abilities and prior knowledge of the learners they teach and to adapt classroom activities accordingly.

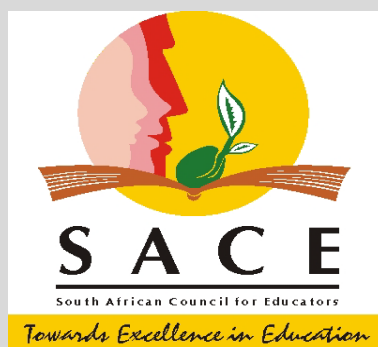

Does your activity/programme/course include a discussion or reflection on how new skills and knowledge can be applied by participants in their teaching environments? If Yes, justify

Yes. The programme includes guided discussion, classroom simulation and reflection on how the LITRE method can be applied in participants' own teaching environments.

Participants consider how the practical activities, blending exercises, teaching aids and assessment activities can be incorporated into their existing literacy lessons. They are encouraged to consider learner differences, available classroom resources and appropriate pacing.

Participants also reflect on their practical experience during the workshop, discuss possible classroom challenges and identify ways in which the method can be adapted to support their learners. The AIT platform provides continued access to the learning materials for reference during classroom implementation.

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

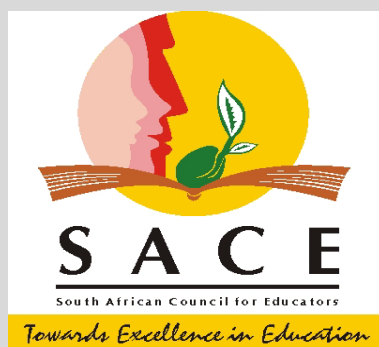

ASSESSMENT: Provide evidence on how your activity design, plans for assessment as well as the use of participants' prior knowledge and interests are addressed? (please attach your assessment tools):

Assessment is integrated throughout the programme and is aligned with the stated learning outcomes. Participants' prior knowledge and classroom experience are recognised during the introduction, practical activities, discussions and classroom simulations.

Assessment includes:

- **Practical demonstration of the LITRE method and use of the Blending Machine, vowels, consonants, flash cards and blending activities.**
- **Chapter-based knowledge checks to assess understanding of the concepts introduced.**
- **Application activities requiring participants to consider how the method can be used in their own literacy teaching.**
- **Reflection and discussion to assess participants' ability to relate the learning to their classroom experience.**
- **Final assessment/examination through the AIT question bank, with questions selected and shuffled to provide an appropriate assessment of overall learning.**
- **The AIT platform records participation, progress and assessment results and provides evidence of completion. Participants who meet the required assessment criteria may receive a programme certificate.**
- **Assessment tools attached: practical activities, chapter knowledge checks/MCQs, application activities, final examination and programme**

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

evaluation.

Please expatiate how the outcomes of your activity/programme/course are linked to the content and assessment?

The programme outcomes, content and assessment are directly aligned. Each outcome is addressed through specific learning content and is assessed through activities that require participants to demonstrate the knowledge and skills acquired.

Participants first develop knowledge of letter recognition, vowels, consonants, blending and word construction through the eLearning content and demonstrations. They then practise these skills through practical and oral activities using the Blending Machine, flash cards and guided exercises.

Participants' ability to demonstrate and apply the LITRE method is assessed through practical and oral activities and classroom simulations. Chapter-based MCQs and knowledge checks assess understanding of the concepts, while application activities and reflection assess the ability to translate the learning into classroom practice.

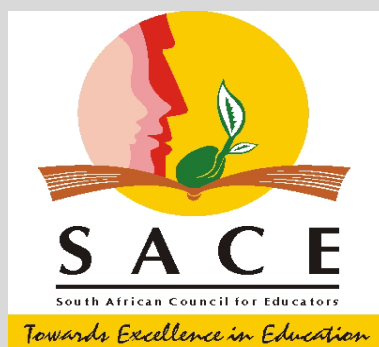

The final assessment provides an overall measure of the participant's knowledge and understanding of the programme outcomes. The AIT platform records progress and assessment results, providing evidence of participation, achievement and completion.

Thus, the programme follows a clear progression:

Knowledge → Practical Skill → Classroom Application → Assessment → Reflection.

LEARNING AND TEACHING SUPPORT MATERIAL (LTSM): Indicate how your training materials support the learning outcomes.

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

The training materials are designed to directly support the programme outcomes by combining digital learning resources with practical teaching materials.

The AIT eLearning platform provides structured lessons, instructional videos, demonstrations, worksheets, knowledge checks, assessments and progress tracking. These materials allow participants to understand the LITRE method, observe its application and revisit content when required.

Practical LTSM includes palm/blending-machine templates, flash cards, alphabet and vowel materials, worksheets and other low-cost classroom resources. These enable teachers to practise the method during the workshop and prepare activities for classroom use.

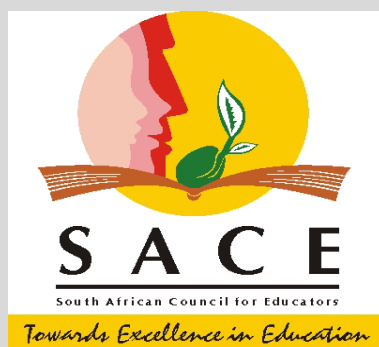

The materials support the progression from understanding the method, to practising it, applying it in the classroom and assessing learning. They are designed so that teachers can adapt activities to available classroom resources and learner needs.

How are the materials and activities going to strengthen teaching in a variety of classroom and teaching environments?

The materials and activities are designed to be adaptable to different classroom contexts and levels of available resources. The core LITRE activities use simple, low-cost and locally available materials, enabling teachers to implement the method without requiring learners to have access to computers or digital devices.

The AIT eLearning platform provides teachers with videos, demonstrations, worksheets and teaching guidance during their professional development. Teachers can subsequently use printed worksheets, flash cards, palm/blending-machine templates and ordinary classroom materials when working with learners.

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

The practical activities can therefore be implemented in well-resourced, low-resource, urban and rural classrooms, with teachers adapting materials and group activities according to learner numbers, available resources, language and prior reading experience.

This approach strengthens teachers' ability to adapt teaching methods to their actual classroom environment rather than depend on specialised technology or equipment.

EQUITY: What efforts do you make in your programme to promote access by all (in terms of financial means, geography, language and gender)

The programme is designed to promote equitable access by keeping the learning requirements practical, adaptable and affordable.

Financial access:

- **The programme uses low-cost teaching aids and does not require learners to have individual computers or other specialised equipment. Where appropriate, worksheets and other materials can be printed for classroom use.**

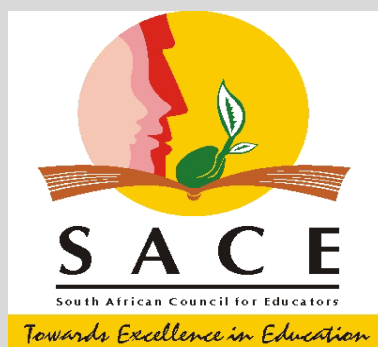

Geographical access:

- **The AIT eLearning platform allows teachers to access programme content beyond the physical workshop environment, reducing dependence on location and enabling continued access to learning materials.**

Language:

- **The programme focuses on the teaching of English reading while recognising that participants and learners may have different language backgrounds and levels of prior knowledge. Teachers can adapt explanations, pacing and**

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

classroom support to learner needs.

Gender:

- Participation is open equally to female and male educators, with no gender-based restrictions on participation or access.

The programme therefore aims to provide a flexible, inclusive and resource-conscious approach that can be applied across different South African school environments.

DELIVERY STRUCTURE (program/plan for delivery) and duration: Have you attached this with clear time allocation?

Yes. A detailed one-day delivery timetable with clear time allocation will be attached as an annexure to the application.

The programme is delivered through a combination of face-to-face practical workshop activities and AIT eLearning. The workshop follows a structured sequence of introduction, demonstration, practical participation, classroom application, assessment, reflection and programme evaluation.

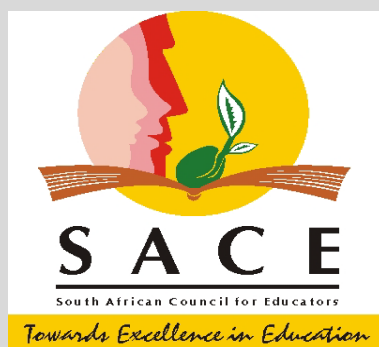

The proposed duration is one full day, with appropriate breaks and a planned closing time to accommodate participants travelling home.

Annexure: *LITRE – I Learn To Read English:*

- ***CPTD Workshop Programme and Timetable.***

CATEGORY OF YOUR ACTIVITY: (Select One, Indicate with "X"):	Curriculum/Subject/Learning-area specific (please specify)	X	Leadership and Management	
---	---	----------	----------------------------------	--

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

	ICT-integration		Wellness programme	
	Special Needs and Inclusive Education		Labour Relations	
	School Discipline		Ethical Conduct	
	Sports, Arts and Culture field		Policy Development and Implementation	
	ETD practitioner based		Research	
	Communication-related			

MONITORING and EVALUATION: How do you collect feedback (about content, method, pace...) from your participants (both qualitative and quantitative)?

Feedback is collected through the AIT eLearning platform at the completion of the programme and through participant reflection during the workshop.

- **Quantitative feedback includes rating scales covering the relevance and usefulness of the content, teaching methods, pace, practical activities,**

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

assessments, facilitator/presenter and ease of use of the AIT platform.

- **Qualitative feedback allows participants to provide comments on what worked well, what was difficult, whether the programme can be applied in their classrooms, and recommendations for improvement.**
- **The AIT platform records participation, progress and assessment results. This provides additional evidence for monitoring achievement of the programme outcomes.**

The collected information will be reviewed by the provider to identify areas requiring improvement in the content, delivery, pacing, materials, assessment and eLearning platform.

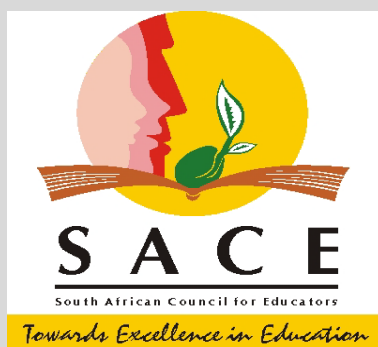

ADMISSION CRITERIA TO THE ACTIVITY/PROGRAMME (Indicate the minimum requirements for admission to this activity/programme/course.)

The programme is intended for serving educators involved in the teaching of Foundation Phase literacy and reading.

Minimum requirements:

- **Participants should be registered educators (preferably SACE) or educators employed in a teaching/support capacity.**
- **Participants should have basic knowledge of classroom teaching and literacy instruction.**
- **Participants should have sufficient English proficiency to engage with the programme content and assessment.**
- **Participants should have access to a laptop or suitable device for the AIT**

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

eLearning component.

- No prior knowledge of the LITRE method is required.
- The programme is designed to accommodate educators with different levels of teaching experience and prior knowledge.

What is the NQF level of the activity/programme/course (where relevant)?

Not applicable (N/A).

This is a SACE professional development activity/workshop, not an NQF-registered qualification, part-qualification or credit-bearing programme. It therefore does not have an NQF level.

Not applicable

In cases of qualification, please indicate if there is Council for Higher Education (CHE) accreditation:

N/A — Not a qualification

Is the qualification registered on the (NLRD)

N/A — Not a qualification

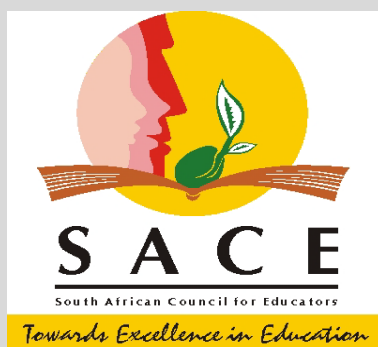

Please supply us with the qualification registration number: **N/A**

SECTION B: FACILITATION PROFILE

Where will this activity/programme be presented?

Face-to-face:

- **At a suitable training venue in Durban, KwaZulu-Natal, or another venue agreed with the relevant education authority/host institution.**

eLearning component:

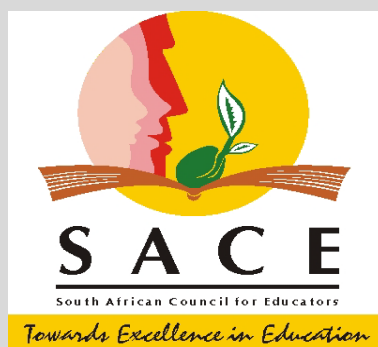

- **Through the AIT eLearning platform, which participants can access remotely.**
- **"Durban, KwaZulu-Natal — venue to be confirmed in consultation with the participating education authorities / host institution.**
- **The eLearning component is delivered through the AIT online platform."**

Indicate the different languages in which this activity is presented

English

The LITRE programme is presented in English, as the programme focuses specifically on the teaching and learning of English reading. Teachers may provide additional

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

explanations or classroom support in the language(s) most appropriate for their learners where necessary.

PARTICIPANTS SUPPORT

Indicate the form of integrated follow up support that will be provided to the participants after your training.

Participants will receive integrated follow-up support through the AIT eLearning platform after the workshop. This includes continued access to programme materials, videos, practical resources and classroom-application guidance.

Participants may use the platform to revisit learning content and teaching resources when preparing classroom activities. The provider will also use participant feedback and evaluation results to identify common support needs and areas requiring clarification or improvement.

Where appropriate, participants will be able to access updated guidance and resources through the AIT platform as the programme develops.

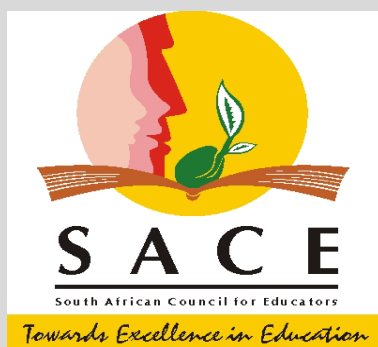

Does your activity contain links with school-based Professional Learning Communities (PLCs)? Please expatiate.

Yes.

The programme supports PLC-based professional learning by encouraging participating teachers to share their experience of the LITRE method with colleagues within their schools.

After completing the programme, teachers can discuss the activities, classroom application, learner responses and challenges with colleagues through existing school-based professional learning structures. The AIT platform can provide the supporting learning materials and resources for these discussions.

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

This allows professional learning to extend beyond the individual participant and supports peer learning, reflection, sharing of classroom practice and continuous improvement.

From where do you recruit your presenters/facilitators?

(Indicate with "X"):

	Current practicing teachers	X
	Retired/Resigned teachers	
	College/University Lecturers	
	Retired lecturers	
	Consultants	
	Current office-based educators	
	Retired office-based educators	
	Unemployed educators	
	Outsourced from NGOs/Other providers /FBOs /CBOs	

Details of Presenters/Facilitators:

What is the duration of your PD activity/programme? 1 DAY

YOU MUST PROVIDE SACE WITH THE FOLLOWING:

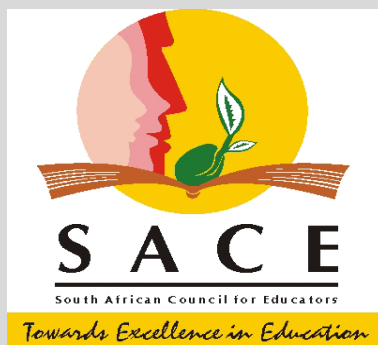

-Details of Presenters/Facilitators names;

-Certified copies of ID,

-Qualifications and CV. NOTE: Uncertified documents are not accepted

N.B: If facilitators are more than five (5), kindly provide the rest on list indicating the details above.

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

Presenter/Facilitator

Name: SUNJITHLALL NANHOO

Organisation: Archoney Institute of Technology (AIT)

Role: Programme Developer and Facilitator

Professional status: Retired educator with over 40 years of teaching experience across various phases of education.

Qualifications:

- **Three-year Diploma in Education, Springfield College of Education — specialisation in Mathematics and Accounting.**
- **BCom, with three majors.**
- **B.Ed. General, University of South Africa.**
- **B.Ed. Specialisation in School Counselling, University of South Africa.**
- **M.A. in Measurement, Statistics and Education, University of Delaware, USA.**

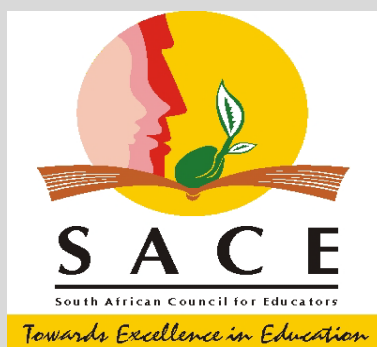

Relevant experience:

- **Experience spanning teaching, mathematics, educational measurement and statistics, and school counselling. Over four decades of experience in education across different phases, with**

Facilitator role in this programme:

- **Programme developer and facilitator responsible for presenting the LITRE methodology, demonstrating the practical activities, guiding participant practice, facilitating discussion and classroom application, and overseeing the assessment and evaluation components of the AIT CPTD programme.**

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

Please ensure that your application contains all the above-mentioned attachments if its duration is from 6 days upwards before sending it to SACE.

Are you collaborating with any other provider/partner in providing this Activity/Programme? (Indicate with "X"):		No
---	--	-----------

If yes, please specify with whom:	
-----------------------------------	--

SUPPORT INFORMATION (MANDATORY/COMPULSORY INFORMATION NEEDED)

Please include or indicate in the application form the following which you will use in your activity/programme:

1. Course outline or programme
2. Presentations
3. Learning material or description of learning activities
4. Assessment tasks
5. Assessment tools and training manuals
6. Program with time allocation

SUPPORT INFORMATION

1. COURSE OUTLINE / PROGRAMME

Attached: *LITRE – I Learn To Read English: CPTD One-Day Programme and Timetable*

Contains the programme purpose, outcomes, modules, sequence and time allocation.

2. PRESENTATIONS

Attached: *LITRE Facilitator Presentation*

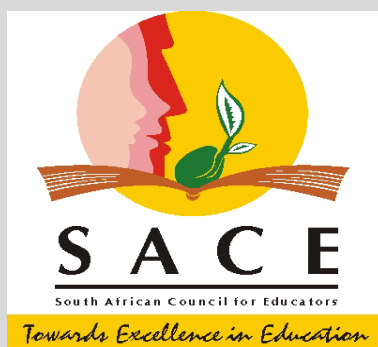

This can be the presenter's workshop material, supported by the AIT videos.

3. LEARNING MATERIAL / DESCRIPTION OF LEARNING ACTIVITIES

Attached / AIT platform:

7. **Introduction to LITRE**
8. **Draw the Palm / Blending Machine**

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

9. English Family / consonants and vowels

10. Vowels

11. T meets the vowels

12. M meets the vowels

PROFESSIONAL DEVELOPMENT ACTIVITY APPLICATION FORM

Provider Declaration and Code of Good Practice

The following code of good practice is binding to all SACE approved service providers whose professional development activities have been endorsed.

- ❖ It is our policy to ensure that we maintain and achieve the highest possible standards with respect to professional development of educators in our organization.
- ❖ We strive to give our educators the best and most effective professional development activities that meet their developmental needs and requirements.
- ❖ We will maintain and continually improve our quality management system.
- ❖ We commit to maintain and adhere to SACE approval standards and we will respect the copyright laws and avoid plagiarism by declaring all the sources used in our material
- ❖ We commit ourselves and our organizations/institutions to SACE monitored site visits, virtual or face to face.
- ❖ We agree to the publication of our activities/programmes and delivery sites in the SACE professional development catalogue.
- ❖ We commit ourselves to submit reports (activities and CPTD points) on educators who have participated in our trainings/programmes. (report educators' participation and PD points to SACE through the register or the provider Self Service Web-Portal)

We understand and accept that SACE has the authority to withdraw/terminate our approval and endorsement status with immediate effect should we default in complying with all the prescripts as set out.

Signed on this day **15TH** of **AUGUST 2026**
